## A MIND GAME

Chess is a board game for two players, played on a checkered board with 64 squares arranged in an 8×8 grid. Each player controls sixteen pieces: one king, one queen, two rooks, two bishops, two knights, and eight pawns. The goal of the game is to checkmate the opponent's king, whereby the king is under immediate attack and cannot escape. There are many different ways to play chess, but the most common is to move one piece at a time. Pieces can be moved to any adjacent square, unless they are blocked by another piece. There are also a few special rules, such as the ability of the knight to move two squares in one direction and one square in another, and the ability of the pawn to capture an enemy piece diagonally in front of it. The game of chess is a complex and challenging one, and there are many different strategies that can be used to win. Some of the most common strategies include controlling the
